

MOBILE APPLICATIONS - PILOT (52)

Regional 2013

KEY

Description

Given a Scenario, the contestant will research the topic and develop a mobile phone/tablet application based upon research conducted. The user may select from the Google Android™, Apple iOS™, or Microsoft Windows Phone™ platforms. The application will be pre-submitted for technical judging. The contestant will be required to present their application to a panel of technical judges.

TOPIC:

Create a mobile phone/tablet application that will assist BPA advisors and students attending the BPA NLC and SLC in scheduling/organizing the time in which attendees will be in attendance at NLC/SLC. Include important activities prior to NLC/SLC directly correlated to NLC/SLC such as flights, team rehearsals and attendee meetings prior to departure. The application should be venue neutral so advisors/students may use the application in future years. The advisor will have the ability to add, delete or edit all specific activities pertinent to attending members prior to and during NLC/SLC. Use your creativity to include additional functionality that would enhance the user's ability to edit the schedule, locate contests rooms, local area attractions/eateries, track the location of attendees, and other such functionality.

Contestants who do not submit an entry that follows the topic above will be disqualified.

Materials submitted at the time of presentation cannot be returned.
